

New Targeted Therapies for Improving Cholesterol and CV Outcomes in Patients with
FAMILIAL HYPERCHOLESTEROLEMIA

AUGMENTED REALITY PHYSICIAN AND PATIENT LEARNING TOOL

This tool can be used for peer-to-peer, physician-to-patient, and physician-to-caregiver discussions.

This AUGMENTED REALITY animation will help patients promptly recognize the symptoms and several treatment options for familial hypercholesterolemia, which can be a serious cardiovascular problem in many cases. This tool can be used for peer-to-peer, physician-to-patient, and physician-to-caregiver discussions. This tool will allow you to open up a pop-up, hands-on virtual world right in front of you. The images and animations that are brought to reality can be manipulated and controlled by YOU.

To use this augmented reality card, please download the
“**Familial Hypercholesterolemia**” app from the Apple App store or Google Play
store on your phone or tablet.

INSTRUCTIONS

- Press the start button and slowly move your device to scan the area around you
- Once a flat surface has been found, you will see a marker appear
- Move your device to reposition the marker and tap the screen when you are ready to begin
- Try rotating your device to landscape mode for a wider view
